

## Applications

CMP slurry, Photochemicals, Plating solution, Acids, Alkalis, Solvents, DI water, Paints, Photoresists

## Description

Profile II filters are all polypropylene innovative depth filters. The fibers in Profile II filters may be considered continuous. No binder resin is used – the fibers are “bonded” by intertwining during the manufacturing process. As a result, Profile II filters show no media migration. Profile II filters can be expected to yield longer service life and lower your total filtration costs.

## Revolutionary Cartridge Construction

### Outer section

(Tapered pore structure: longer service life)

This section has a continuously graded pore structure for built-in prefiltration. With its tapered pore structure and its depth combine to provide long life in service.

### Inner section

(Constant pore: reliable filtration)

The constant pore size provides reliable filtration.

## Features

- Excellent removal efficiency
- No media migration
- Low pressure drop
- High contaminant holding capacity
- Low extractables (no binders or resins)
- Broad chemical compatibility

## Specifications

### Materials of Construction

Components	Materials
Filter medium	Polypropylene
Core	Polypropylene
Endcaps and cage (MCY, AB type)	Polypropylene
Sealing methods (RMF type)	Santoprene <sup>1</sup> rubber

<sup>1</sup> Santoprene is a trademark of Exxon Mobil Corporation.

### Operating Conditions

Maximum Temperature <sup>2</sup>	82 °C / 180 °F
Maximum Differential Pressure	0.41 MPa (< 30 °C) 0.34 MPa (< 50 °C) 0.21 MPa (< 70 °C) 0.10 MPa (< 82 °C)

<sup>2</sup> Consult your local Pall representative on the condition at high temperature over 49 °C.

AB type

RMF type

MCY type
