Client Testimonial — Wanzl UK

"We are extremely pleased with the service provided by Michael and his team at Riley Surface World. The entire experience was seamless from start to finish."

— Lee Sheriff, Plant Manager, Wanzl

We are extremely pleased with the service provided by Michael and his team at Riley Surface World. From start to finish, the entire process was seamless and exceptionally well-managed.

We first contacted Riley's in early September 2025. They quickly gathered and analysed all the necessary information to accurately assess the value of our equipment. Shortly after, we received a site visit from their representative, Will Green, whose knowledge and experience were evident. He clearly explained how the Direct From Site Sale operated and confirmed it was the best route to secure the highest possible return for our redundant asset.

Riley's then dispatched a team to professionally photograph and data-collect details of our Gema Powder Coating Plant. The listing they created was of outstanding quality, and we were genuinely impressed with how our equipment was presented on their website.

Within just 12 weeks of going live, Riley's had attracted a serious buyer. They handled all negotiations on our behalf, and Michael Riley personally escorted the customer to our site for inspection.

The transaction was smooth from agreement through to removal. The goods were taken off-site professionally and within the agreed timeframe. Riley's also provided a skilled team to remove additional equipment, including the careful handling and lifting of sensitive items such as the Gema Optiflex.

We received the full agreed payment promptly, and the cleared space has now allowed us to progress with other projects.

I would not hesitate to recommend the Riley Surface World Direct From Site Sale service and would gladly use it again in the future.
