

Fans And Blowers Ltd Twin High Pressure Air Knife Blowers

Stock No	MA698
Manufacturer	Fans And Blowers Ltd
Model	High Pressure Blowers
Serial	BE379
Condition	From a working environment, Good Condition
Capacity	Duty range between 0.024 m ³ /s - 1.7 m ³ /s
Process Application	Air Knives / Blow off / Cooling / etc.
Other Info	Air pipes Ø200mm : Twin 18.5kW Motors
Location	Our Central Warehouse, Aldridge, UK
Weight (kgs)	1230
External Dimensions (WxDxH mm)	2400 x 1250 x 2100

Description

Acoustic Chamber housing twin high volume blow off fans with filtered inlet and Ø200mm outlet pipework.

Former Rolls Royce Machinery

This plant is one of several machines acquired during Rolls Royce's reorganisation of their manufacturing facility at

Inchinnan, UK.

Their worldwide reputation for quality is reflected in the machinery and maintenance of their manufacturing plant. Many of these machines include features that are necessary for the manufacture and servicing of high quality engine components, but can provide a benefit to any industry.

Ideal for fitting into a production process where a blow off or air knives are used or installed. This acoustic enclosure houses the blowers giving a safer working environment both from noise and moving parts.

Can be easily connected to existing machinery via pipe work or ducting in enhance or replace existing equipment.

Industry and applications

The QZ range of centrifugal fans can lend itself to a variety of industries and applications. This range can often be seen to support air knives in industries such as food and waste management. This range also suits combustion air applications in cremation, incineration, ovens and kilns. For other and bespoke applications.

- Duties ranging from 0.024 m³/s - 1.7 m³/s.
- Twin motors 18.5kW each

Photographs taken prior refurbishment. Our refurbishment service is not available on all machines.
