

Spark arrestor box

Stock No	EA1871
Model	In line Spark Arrestor unit
Condition	From a working environment
Filter Area ft ² / m ²	Spark Capture
Other Info	Multiple inlets
Location	Our Central Warehouse, Aldridge, UK
Weight (kgs)	100
External Dimensions (WxDxH mm)	1500 x 900 x 1750

Description

Spark Arrestor Box

- The spark trap is designed primarily as an accessory to source capture ducted exhaust or dust and dust/fume collection systems for grinding, deburring, cutting, welding and a variety of other applications.
- This source-capture system reduces the potential for fire hazard by capturing sparks before they reach the main containment unit, where dust or other flammable materials may be present.
- It can be mounted in-line on a duct system or system collector and feature an integral clean-out draw for easy access to the cleanable spark arrestor water trap.
