

George Fischer Type 240 Butterfly Valve with Pneumatic Actuator

Stock No	MA745
Manufacturer	George Fischer
Model	Type 240
Year of Manufacture	2011
Serial	Various
Condition	From a working environment, Good Condition, Current Model
Capacity	Bore Ø80mm
Process Application	Flow control and closure
Other Info	Only Gate & Body make contact with fluid
Location	Our Central Warehouse, Aldridge, UK

Description

George Fischer Pneumatically Activated Butterfly Valve with Omal Electrical Switch Position Indicator.

The George Fischer butterfly valve is the type 240 valve combined with a PA30-90 series pneumatic actuator. These valves can be used in a wide variety of conditions and are suitable for a broad range of applications. Especially when transporting contaminated, aggressive or abrasive media, this type of valve has decisive advantages thanks to its simple function and optimized construction. Only the valve body and valve 'gate' come into contact with the medium.

All valves are fitted with a Omal FXSB2012 electrical position indicator

Applications

- Control applications
- Controlling pure and ultrapure media
- Water treatment
- Chemical dosing
- Applications with higher viscosity and solids content Benefits/features
- Safe transport of aggressive media
- Adapting closing forces to medium pressure through reduction of spring assemblies
- High corrosion resistance
- Maximum system safety
- Safe maintenance and minimal downtime
- Broad spectrum of applications
- Quick retrofitting through simple integration of accessories

Bore diameter 80mm
