

Ultra Projects Ltd. 1500 Litres Agitation Tank

Stock No	DE1595J
Manufacturer	Ultra Projects Ltd.
Model	1500 Litres Agitation Tank
Year of Manufacture	2018
Serial	18/200
Condition	From a working environment, Excellent Condition
Work Envelope (WxDxH mm)	2700 x 900 x 640mm (1500Litres)
Process Stages	Single Stage
Other Info	Stainless Steel : Fume Extraction Fan
Location	Our Central Warehouse, Aldridge, UK
Weight (kgs)	1650 kg
External Dimensions (WxDxH mm)	3050 x 1800 x 3000mm

Description

Electrically operated immersion / agitation solvent dunk cleaning / degreasing machine. Manufactured from stainless steel this very large immersion / agitation solvent cleaning machine comes with a bifurcated fume extraction fan suitable for connecting to a suitable fume scrubber or extraction unit.

The dunk machine is particularly effective for cleaning tubular items or components that have hollows which need to be

flushed through with solvent. This machine is fitted with an electric drive motor which is connected via hoist straps to the wash basket carrier.

A lever control raises the wash basket to the loading position and the basket is loaded then lowered into the solvent. During the cleaning cycle, the basket is raised and lowered by an electric drive motor, causing a flushing action to occur so the components are cleaned quickly.

Specification.

- 415 Volt, 3 phase, 50 Hz.
- Stainless steel construction.
- Designed for white spirit, solvent cleaning.
- Pneumatic lid activation.
- Bifurcated fume extraction fan.
- Audible alarm system.

Photographs taken prior refurbishment. Our refurbishment service is not available on all machines.
