Description

A fetting booth with workbench and additional equipment creating a safe working environment for workers who are producing nuisance dust or fumes as they work.

- Previously used in Rolls Royce as part of the engine manufacturing process.

Easy to install and very flexible

The booth can be connected directly to an external fan either in a stand alone system or with other booths and extraction

arms and filters, in a centralised installation.

Can be used for the following operations;

- Fettingling.
- Buffing.
- Grinding.
- Sanding.
- Cutting.
- Polishing.
- Gluing.
- Bonding.
- Mixing.
- Certain welding applications.

Spec.

- Bench size 1440 x 700 x 800 height from the floor.
- 2 twin fluorescent light
- Magnifying glass mounted on an adjustable arm.
- 2 x Ø300 dust extraction ports to the rear wall.
- Adjustable dust extraction arm for precise extraction needs.
- 4 off, 240 volt plug sockets with RCD's.
- Pneumatic air line point.

For a suitable extraction system see EF2280

Photographs taken prior refurbishment. Our refurbishment service is not available on all machines.
