

## PMD (UK) Effluent Treatment Plant

Stock No	<a href="#">EXC400</a>
Manufacturer	<a href="#">PMD (UK)</a>
Condition	From a working environment, Excellent Condition
Location	Newry, Northern Ireland, UK

### Description

A self contained automatic effluent treatment plant previously installed to support multiple plating & processing lines, it provides reliable & compliant treatment of rinse waters together with selected acid and alkaline process discharges. The system is designed to neutralise and condition effluent streams to meet the applicable site discharge consent requirements, ensuring safe, controlled and environmentally responsible operation.

Engineered for dependable performance and straightforward monitoring, the plant integrates neutralisation, chemical dosing, settlement and flow control within a dedicated treatment area.

### Professionally Decommissioned by Jacquet Weston Engineering

This effluent treatment plant remains fully packed & securely strapped following professional decommissioning by leading immersion manufacturer Jacquet Weston Engineering. Carefully preserved & protected, it is ready for immediate delivery to your facility for a quick & easy transition from purchase to production.
