### Summary of the Products Below:

#### **Grade 2F/3/PTFE - Cotton Fabric Based Laminate with Added PTFE**

- Self lubricating dry bearing material.
- Cotton fabric reinforced phenolic laminate with evenly distributed PTFE throughout the structure, ensuring lubrication is always present at the bearing surface to enhance low friction performance.
- Combines the strength, rigidity, toughness, and machinability of phenolic laminates with the low friction benefits of PTFE.
- Self-lubricating design helps reduce wear, lower maintenance needs, and allows for easy machining.
- Thermoset construction makes it suitable for load bearing applications.
- Ideal for manufacturing environments requiring clean, quiet, and long life dry bearing solutions.
