Stock No	DPS515
Manufacturer	Canning
Model	1612
Serial	A5003
Condition	From a working environment, Good Condition
R.P.M.	2920
Hp/Kw	5ph
Location	Derby, UK

Description

The Canning 1612 polishing machine is a traditionally built, heavy duty manual polishing machine renowned for its durability, reliability, and long service life. Primarily designed for use with polishing mops, buffs, and bobs, it is equally suited to a wide range of rotary abrasive tools, including abrasive nylon wheels, flap wheels, deburring wheels, wire wheels, and abrasive brushes.

Featuring double-ended spindles for maximum versatility and powered by a robust high-torque motor, the 1612 remains one of the industry's most widely used polishing machines.

Complete with heavy duty Canning backstand idler and machine guards, this well-maintained machine has been recently refurbished with new bearings and is presented in excellent working condition.
