

Everest ESP120S Spray Wash Machine

Stock No	DF1636
Manufacturer	Everest
Model	ESP120S
Year of Manufacture	2013
Condition	From a working environment, Good Condition, Current Model
Work Envelope (WxDxH mm)	Basket Diameter 1200mm (TBC)
Process Stages	Single Stage
Other Info	Adjustable Process Timer
Location	Our Central Warehouse, Aldridge, UK
External Dimensions (WxDxH mm)	1520 x 2000 x 1640mm (TBC)

Description

ESP cabin type pressure washing system provides cleaning of coarse dirt such as oil, grease, production wastes accumulating on the surface of the parts leaving the production or maintenance line with pressurized water and chemicals. Three-angle nozzle system is offered as standard in ESP washing systems, where only the washing process takes place in a single cabinet.

Washing system

- Automatic washing with pressurised spray water and basket turntable rotation system.
- Designed to clean heavily polluted components.

- Manual Loading / Unloading.
- Adjustable process timer.
- removeable basket

Working principle

- To clean all surfaces of the parts, the parts are automatically washed with hot water and chemical detergents with the help of pressurised spray jet nozzles.
- Suitable for medium to heavy weight products up to 300Kgs.

Tank system

- Single tank with heating.

Construction

- 304 stainless steel.
- Control Panel.

Recent Work Includes;

- New Bearings motor.
- New Pump seal.
- Bearing Blocks for the rotation basket.
- New Wheels.

Photographs taken prior refurbishment. Our refurbishment service is not available on all machines.
