Hedinair 300°C, Air Circulating, Box Oven

Stock No	OF2703
Manufacturer	Hedinair
Serial	18283
Condition	From a working environment
Internal Size (WxDxH mm)	610 x 700 x 610
Max Temp	300°C
Other Info	Stand Mounted Shelf Storage Below
Location	Our Central Warehouse, Aldridge, UK
Weight (kgs)	300kg
External Dimensions (WxDxH mm)	1020 x 1050 x 1000 (1600 on stand)

Description

This Hedinair industrial 300°C recirculating box oven maximises your production throughput, reduces energy costs and achieves flawless product finishes. Engineered specifically for demanding industrial environments, these heavy duty ovens offer the perfect balance of precision temperature control and reliability.

Manufactured from steel, this oven consists of a single heavy duty door, hinged from the left hand side and locked by a single action two point locking system. The re-circulation fan, along with the heater elements are located at the rear of the oven, with its drive motor at the back of the oven.

Inside the oven there are a number of removable product trays, manufactured from heavy gauge steel, providing strength with minimal impact to air circulation profiles.

(Oven can be removed from stand and placed onto customers own worksurface)

Features

- New rear air circulation fan - 0.25kW /2855min-1/50hz
- Roof vent and control damper - 75mm
- 13 internal shelves supplied - 590mm x 590mm
